

Reception Easter Project

To Reception,

We know it has been interesting and sometimes even strange being at home, but it is something we all have to do, and we are missing you all!

Next term, we are going to be learning all about animals and their habitats. During the Easter break, we would like you to create a habitat of your choice. A habitat is the environment where animals live. You can use an old shoebox to create your habitat. E.g. sea animals live in the ocean, farm animals live on the farm or wild animals live in the jungle or rainforest. Your habitat must include animals and the different features you will find there. Make sure to ask your adults first before you take anything to make your habitat.

Before you can start making your habitat, you must draw up a plan of how you will be making it and include labels of where things will go. When you have finished making your habitat, can you write about what you have made and why.

We look forward to seeing all your habitats!

Enjoy creating!

Miss Able-Thomas and Mrs Alban
