You Can Tie Dye
Rainbow Spirals

Make a pinch in the centre of your damp prewashed t-shirt & twist.

Twist until the whole t-shirt is in a spiral. You can even out the ridges as you twist if you like.

Put 3 rubber bands on to hold the shape together. Try to place them evenly like pieces of pie.

Dye 3 pieces of pie (or 1/2 the t-shirt) Yellow. When you turn it over later, dye yellow in the same place.

Next dye 1/2 Magenta. Overlap 1 of the yellow pieces of pie to make an orangey colour.

Dye the last 1/2 Turquoise. Overlap 1 piece of yellow to make green & 1 piece of magenta pie to make purple.

So my love of morning TV has come back and the other day they were talking about tie dyeing t-shirts. In fact some children had successfully done this to whole outfits and even bed covers!

Please DO ask your parents if you are allowed to do this beforehand – I don't want to get in trouble with them. Also make sure you have a clean workspace

AND – most important please can you make sure that when you wash this shirt that you either hand wash it or put it in the washing machine

Have fun!

SALT DOUGH HANDPRINTS

Salt dough is a fun way to create impressions that will last as decorations, like your hand prints, baby's feet and even paw prints. Once you have made and baked the dough, you can jazz them up with some bright paints and decorations. PLEASE DO THIS WITH BOTH YOUR PARENT/CARER'S PERMISSION AND HELP AND SUPPORT – ESPECIALLY WHEN COOKING!

This could be something that you could even include in your time capsule or perhaps display in your house – my friend has

INGREDIENTS

300g plain flour

150g salt (cheap table salt)

150g tepid water

METHOD

1. Preheat the oven to 100 degrees and line a baking sheet with parchment
2. Mix the flour and salt in a large bowl. Add the water and stir until it comes together into a ball.
3. Transfer the dough to a floured work surface, knead a little until pliable and springy
4. Separate into balls and flatten into discs big enough to press a hand in
5. Put your finished items on the lined baking sheet and bake for around 3 hours
6. Leave to cool and then paint or glitter as you wish

So I don't know if you saw the online sensation of the marble run?

So due to sport being put on hold – people have been watching marble runs – and therefore creating your own – it doesn't have to be a marble run – could be for a ball – you could make a large scale one of you only have a larger ball – it doesn't matter!

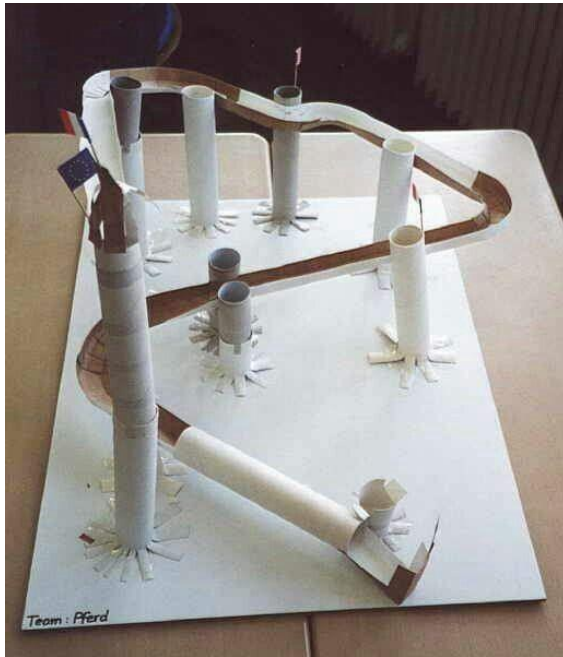

I've seen some great ones on pinterest and other websites online

Your challenge: is to build your marble run and then commentate on it =) I want it rather like you'd expect in horse racing or football

Here are some examples

4

Another internet sensation that's sweeping the net is commenting. As sport is halted for the moment, rugby commentator Andrew Cotter has put his skills to use entertaining the nation by commenting on videos such as penguins in Australia, his own dogs and even two strangers crossing a road!

If you have the internet you can listen to these – make sure you have permission from an adult first

You could then try to make your own – could you try to video your own and add your own commentary (please make sure you have permission of those you are filming) or perhaps choose a video and add commentary over the top – it could be something on TV such as a cartoon or film where you change the audio

I know you guys are much better at technology than I am and will be able to do this – please send them in to go on the website – we all need a good laugh!

Year 6 May Half Term Holiday

5	Design your own golf game – I think this is a brilliant idea and literally just requires a cardboard box and some balls – again if you have larger balls then you could just increase the size of this Why not have championships? Play each day and tally the scores up?
6	Find or create yourself a little notebook Obviously, we are unsure as to what the situation will be with Year 6 with regard to coming back to school. However, if this isn't something that can happen, then we were planning on helping you to create your own year book at home – something that you can design yourself, take your time over, personalise and put as much effort into as you wish. Over the next coming weeks we will be giving you ideas of things that you could put into this year book, however, if you can source one, put some paper together or if you would like to buy one off of amazon

Year 6 May Half Term Holiday

or Tesco, that will give you a head start. It doesn't have to look amazing to start with -you can decorate it. Or if you would like to buy one that's a bit more snazzy ask a parent if you are allowed. Personally I think making it all yourself is better – it's all your work then =)
