

Year 6 - Week 11

1	Miss J's set: As we are beginning to come out of lockdown and ease restrictions more and more, what are your thoughts on your personal development. How has this peculiar time shaped and changed you? Consider – do you think it has made you into a better person? Have you acquired any new skills or have you learned anything? What will you appreciate more as we come out of the lockdown period? For example – I now appreciate having a job and being able to speak to so many people very day – I've been locked up for around 13 weeks and apart from my mum, sister (both from a distance) and partner I've not seen anyone else I know in person! Your task is to write a reflection based upon your time in lockdown. How do you feel you will appreciate the world more as restrictions are eased? I will most definitely appreciate just being able to hop in the car and go to the shops, or arrange last minute meet-ups with my friends. Weirdly enough, I will appreciate seeing you guys every day – this has really confirmed that I love doing the job I do Miss P set: As the lockdown will be easing down and the restrictions will be removed slowly, what have you learnt? Think and plan about your: - Feelings - Personality - Character - Diet - Lifestyle	Miss J's set: Puzzle time Digit detector  You have got to be a detective to solve the problem below. What is the least number of calculations you need to do to be absolutely certain of how much Norman Number is worth? You must do them in the order shown. <u>How many am I?</u> 1. I am a three digit number. 2. I am an odd number. 3. I am divisible by 5. 4. Each of my digits is different. 5. My digits add up to 8. 6. The tens digit is smaller than the hundreds digit. 7. I am less than 300. 8. I have only one even digit.  Miss P set:	Challenge: Can you create your yearbook/leavers book front cover?  
---	--	---	---

Year 6 - Week 11

	- Relationship with friends and family	3 Caroline saves the same amount of money each month. She saves £420 in 3 months. How much does she save in a year? 	
2	Miss J's set: Continue to write your reflection – remember to focus on the positives. When you read this back in years to come you'll need to use it to remember everything as we can't always remember everything we thought and did. Remember to include the little things too – the little laughs you had, maybe some of the tantrums and tears – but through it all how you managed to deal with it. Miss P set: Read through your planning points. Begin writing a reflection. Try and focus on the positives. Focus on your grammar and punctuation.	Miss J's set: Puzzle time Dizzy digits  You can play around with your calculator to work out this puzzle. You can use the +, -, x, ÷ and = keys. This puzzle is in three parts. You need to answer all three parts. Part 1: Use four 4's to make 44 Part 2: Use five 5's to make 55 Part 3: Use six 6's to make 66 Remember: You can use any of the +, -, x, ÷ and = keys. Now let's see... 4 + 4 + 44 = 52 that's no good How about 44 x 4 - 4 Erm...not quite. 	Challenge: Can you draw a cartoon drawing of everyone in your class? This will form one of the pages in your year book – and even though not everyone may be your friend – it's great to remember everyone. Over the lockdown period I have been speaking to some of my high school teachers and one got our year group photograph out of his loft and posted it online – was lovely to remember this. I know it won't be a photograph – but this will just allow you to put more effort into your year book and make it your own! Please do remember though to keep pictures respectful – you wouldn't like to find out that someone had drawn a not so nice picture of you

Year 6 - Week 11

		3 Leon cycles the same distance each day. He cycles 272 km in 4 days. How far does he cycle in 7 days?  	
3	Miss J's set: Continue with your reflection – you may want to start thinking about editing and redrafting this – remember this is something that you can keep away safely in a box – a little like your time capsule – and revisit when you are older. I've kept lots of things from lockdown – including my letter from Boris – as I will want to show some people this when I am older. Miss P set: Continue with your reflection – you may want to start thinking about editing and redrafting this.	Miss J's set:	Challenge: Don't forget that you didn't just mix with your class this year, you were in sets too – so I'd do the same for the other year 6 class too. Remember again, although you may not have been friends with them, they were still a part of our team. Please do remember though to keep pictures respectful – you wouldn't like to find out that someone had drawn a not so nice picture of you 

Year 6 - Week 11

		Puzzle time Dress 'Addy' Addy likes red, blue and yellow. He has a red, a blue and a yellow hat. He has a red, a blue and a yellow t-shirt and he has a red, a blue and a yellow pair of shorts.  How many different ways can I dress - perhaps I could start with a red hat, red shirt and red shorts....  Miss P Set: 3 A baker sold 93 more pies on Tuesday than Monday. She sold 55 fewer pies on Tuesday than on Wednesday. She sold 236 pies on Tuesday. How many pies did she sell in total? Mon Tues 236 Wed	
4	Miss J's set:	Miss J's set:	Challenge:

Year 6 - Week 11

	Do you want to do any illustrations to go alongside your reflection – sometimes although we like to read about things, pictures can detail and capture the exact moment. If you don't have access to a camera you could always just draw these. It doesn't necessarily have to be of people, it could just be a piece of art work that you would like to use to accompany your piece. Miss P set: Continue with your reflection. You can add some drawings to assist you. Pictures can detail and capture the exact moment.	   Puzzle time Food for thought Multi was lazing on the beach when he was feeling peckish. He went to the café and bought 2 iced buns and 1 lolly. It cost him 80 pence. Divvy came along just as Multi was finishing the iced bun. "Hey, where's mine?" he shouted. "All gone" muttered Multi, feeling rather guilty. "Well, I'll just get my own then," said Divvy, "I'll show you!" Showing off, Divvy bought 3 iced buns and 2 lollies. It cost him £1.30. He took them back and sat down next to Multi and then ate all the buns in one go. Five minutes later: "Err, I don't feel very well," groaned Divvy, "would you like to buy the lollies off me?" "OK," said Multi, "How much did they cost?" Good question: how much did each lolly cost? Miss P Set: How many rectangles can you have that has an area of 100010 cm squared? How many cuboids with a volume of 100010cm cubed could you have?	Make a list of all the silly/or funny things that have happened in year 6 this year – you could even go back and do this for other years if you wish too. You could do it as like a top 10 funny moments. When you're old, like me, you can't remember everything – so if you note it down you can keep it. These don't have to be things that teachers know about – they can be personal to you – and don't worry we won't find out about your little jokes that you have behind our backs either – all students have these! You may even have to do a little illustration to accompany these to help jog your memory.
5	Miss J's set: Send in and share your reflection – I will be showing off some things that I've learned from the lockdown period and will be reflecting on some moments from my time in lockdown. So maybe we can read each others – I'm looking forward to seeing some of the things you've been up to and hearing about how you've been helpful and hopefully become a better person, who is thankful for the life they lead.	Miss J's set:	Challenge: Transition task: Make sure that you have looked up your route to high school. Have you considered an alternative route – just in case? Have you considered the safe places to cross the roads, where you may be getting off the bus, any unsafe places along the way that you may need to think about?

Year 6 - Week 11

Miss P set:

Read and edit your reflections. Send us your entries – I can't wait to read them

Puzzle time

Funky 15

For this puzzle it is a good idea to have a set of 0 to 9 cards. If you haven't got any don't worry - just jot down the numbers 0 to 9 on a piece of paper and cut them out, or use the numbers below.

Use 3 cards to make a total of 15.

Easy eh!
But what I want to know is:

how many ways are there of making 15 by
adding three cards?

(Don't forget to use the nought card!)

Lots of thought
needed for this one!

Miss P Set:

A shape is made of 3 rectangles.

The total area of the shape is 150 cm²

The area of rectangle A is 33 cm²

Rectangle B is half the area of C.

What is the area of rectangle C?

A 33

B

C

Can you and your parents do a 'dummy run' of this route before you start in September? Now may not be the right time – especially if you are using public transport – but otherwise, can you try the route? And the route home? Can you remember it by yourself?

Year 6 - Week 11
