

Year 4 Easter Homework Project

Make a 3D travel machine from recycled materials e.g. cartons, boxes, kitchen rolls etc.

Draw and label your machine

- Does your machine fly? Float on water? Travel on the road? Or all 3?
- Label parts e.g. cabin, wings, propeller etc
- Explain how to operate the machine e.g. buttons, steering wheel, computer codes

Write a story about your machine

- Think about at least 3 characters e.g. children, professors, scientists
- Plan your main setting e.g. forest, desert, beach, mountain
- Plan a clear beginning, middle and end
- Does one of the characters make the machine or find the machine?
- What is the problem? Is there a challenge the characters have to face? Do they need to escape from something? Are they going to rescue someone? Are they looking for treasure?
- How is it solved?

Try to use a range of sentences and interesting vocabulary. Proofread your work carefully making sure that you have followed your plan and that it all makes sense.

Have fun with your Easter Project. Stay safe and healthy.
